

Automated segmentation of atherosclerotic arteries in MR images

Maribel Adame

Colophon

About the cover

The circles on the cover represent cross sections of an arterial wall. When the back and the front covers are seen together, from left to right, progression of atherosclerosis can be observed, going from concentric circular structures (healthy vessels) in the back cover, to elliptical shapes (diseased vessels) in the front cover, with shrinking of the inner contour and enlargement of the outer one. The distance between the straight lines is an abstraction of the vessel wall thickness, which increases as the disease progresses.

Automated Segmentation of Atherosclerotic Arteries in MR Images

Automated segmentation of atherosclerotic arteries in MR images

**Automatische segmentatie
van atherosclerotische bloedvaten
in MR beelden**

Proefschrift
ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van de Rector Magnificus prof.mr.dr. P.F. van der Heijden,
volgens besluit van het College voor Promoties
te verdedigen op woensdag 4 april 2007
klokke 13.45 uur

door

Isabel Maria Adame Valero
geboren te Sevilla (Spanje)
in 1978

Promotiecommissie

Promotor: Prof. dr. ir. J.H.C. Reiber

Co-promotores: Dr. ir. B.P.F. Lelieveldt

Ir. R.J. van der Geest

Referent: Dr. Z.A. Fayad (Mount Sinai Hospital -New York)

Overige leden: Prof. dr. A.J. Rabelink

This work was carried out in the ASCI graduate school.
ASCI dissertation series number 138

Financial support for chapters 3-5 was provided by the Marie Curie Industry Host Fellowship (grant HPMI-CT-2002-00175). Chapter 5 was also supported by contracts N01-HC-95159, N01-HC-95162, and N01-HC-95168 from the National Heart, Lung, and Blood Institute. The research described in chapters 6 and 7 was financially supported by the Dutch Science Foundation (NWO), under an innovational research incentive grant nr. 016.026.017.

Financial Support for the publication of this thesis was kindly provided by:

- Medis *medical imaging systems* bv.
- Stichting Beeldverwerking Leiden.
- Foundation Imago (Oegstgeest)
