The dizzying pace of change in urban China is nowhere more evident than in Beijing. No city on earth is reinventing itself more rapidly than the next Olympic city. Half the world’s production of steel and a third of its concrete is feeding the voracious appetite for construction. New apartments, hotels, offices, stations and roads are transforming the landscape of the capital. Old sites are torn down, making way for new ones, in the relentless pursuit of modernisation.

But there are still a few corners of the city that have managed to avoid the bulldozers. MuXiYuan, in the south of Beijing, is one of them. Jikky Lam’s photographs offer us a snapshot of the daily lives of the people living in the neighbourhood: doing groceries, running errands, cooking, chatting with acquaintances. A glimpse of mundanity in the face of frenetic change. MuXiYuan’s small streets and narrow lanes are hemmed in by new high rise apartments on one side, and a huge overpass on the other. There are no plans as yet for rebuilding MuXiYuan, but surely it is only a matter of time before the ‘city that ate the world’ swallows up the final traces of its 19th century self.

is a Bachelor student in Cultural Anthropology & Development Sociology at the University of Leiden, and Asian Studies at the University of Amsterdam.
Energy Programme Asia (EPA)

The New EPA-Joint Research Programme

Domestic and Geopolitical Challenges to Energy Security for, China and the European Union

A Joint Research Programme between Energy Programme Asia (EPA)-IIAS and the Institute of West Asian and African Studies (IWAAS)-Chinese Academy of Social Sciences (CASS) in cooperation with the Institute of Industrial Economy-CASS.

The objectives of this comparative research project are to analyse (a) the geopolitical and (b) domestic aspects of energy security challenges for the European Union (EU) and China and their impact on energy security policy strategies. The geopolitical aspects involve analysing the effects of competition for access to oil and gas resources and the security of energy supply among the main global consumer countries of the EU and China. The domestic aspects involve analysing domestic energy demand and supply, energy efficiency policies, and the deployment of renewable energy resources.

The research program is funded by the KNAW for a duration of three years: September 1 2007 - September 1 2010.

The Core Research Team

- Dr. M. P. Amineh - EPA-IIAS, Programme Manager
- Prof. Yang Guang - IWAAS-CASS, Programme Manager
- Dr. Chen Mo - Institute of West Asian and African Studies-CASS
- Prof. W. Kemenade - International Institute for Asian Studies
- Prof. Dr. Kurt Radtke - International Institute for Asian Studies
- Prof. Shi Dan - Institute of Industrial Economy-CASS
- Prof. Dr. E.B. Vermeer - Leiden University

Activities:

Forthcoming events:

The First research-oriented meeting, the Institute of West Asia and African Studies-CASS, December 14-15, 2007, Beijing-China

The second research-oriented meeting in the Netherlands, October, 19-20, International Institute fro Asian Studies, Leiden, the Netherlands
