PROMOTIECOMMISSIE

Promotor: Prof.dr. M.D. Ferrari

Copromotores: Dr. G.M. Terwindt
Dr. J. van der Grond

Referent: Prof.dr. P.R. Saxena

Overige leden: Prof.dr. J.G. van Dijk
Prof.dr. M.A. van Buchem
CONTENTS

General introduction and aims of this thesis 7

1. The Prevalence of Premonitory Symptoms in Migraine; A Questionnaire Study in 461 Patients. 19

2. Is stress a trigger factor for migraine? 27

3. Normobaric hypoxia and nitroglycerin as trigger factors for migraine. 37

4. Mild Cerebral Edema in Acute Mountain Sickness After Isobaric Hypoxia. 45
   A 3 Tesla Magnetic Resonance Imaging Study.

5. Magnetic Resonance Angiography of the Human Middle Meningeal Artery: Implications for Migraine. 59

6. Cerebral blood flow response to nitroglycerin predicts the occurrence of a provoked migraine attack 67
   Submitted

7. Migraine headache is not associated with cerebral or meningeal vasodilatation - a 3T magnetic resonance angiography study. 83
   Brain. 2008 May 23 (epub ahead of print)
