Financial support for the publication of this thesis was kindly provided by the Arbo Advies, Medical Market, Stichting Prof. Dr. J. Jongbloedfonds, Federatie van Nederlandse Trombosediensten, de AMSTOL stichting, de stichting tot steun promovendi vasculaire geneeskunde, de Jurriaanse stichting, Astra Zeneca, Boehringer Ingelheim BV, Glaxo Smith Kline BV, Leo Pharma BV en Sanquin.
Air travel and venous thrombosis

Results of the WRIGHT study

Part II: Mechanism

Proefschrift

Ter verkrijging van de graad van Doctor
aan de Universiteit Leiden,
op gezag van de
Rector Magnificus prof. mr. P.F. van der Heijden,
volgens besluit van het College voor Promoties
te verdedigen op donderdag 24 september 2009
klokke 16:15 uur

Anja Johanna Maria Schreijer

geboren te Ambt-Delden in 1976
Promotiecommissie

Promotores:  Prof. F. R. Rosendaal
            Prof. H.R. Büller, Academisch Medisch Centrum Amsterdam
Copromotores:  Dr. S.C. Cannegieter
Referent:  Prof. Dr. M. Greaves, University of Aberdeen
Overige leden:  Dr. S. Middeldorp
            Prof. Dr. P.H. Reitsma

The work described in this thesis was performed at the department of Clinical Epidemiology at the Leiden University Medical Center in Leiden, the Netherlands and at the department of Vascular Medicine at the Academic Medical Center in Amsterdam, the Netherlands. The research was done in the framework of the WRIGHT initiative (WHO Research Into Global Hazards of Travel), and was sponsored by the UK Government and the European Commission. A part of the research was also supported by a grant from the Leducq Foundation, Paris, France for the development of Transatlantic Networks of Excellence in Cardiovascular Research.

Financial support by the Netherlands Heart Foundation for the publication of this thesis is gratefully acknowledged.
# Table of Contents

Chapter 1. General Introduction and Outline of the Thesis 7

Chapter 2. Travel and Venous Thrombosis: a systematic review 13

Chapter 3. Activation of coagulation system during air travel: a crossover study 39

Chapter 4. Fluid loss does not explain coagulation activation during air travel 57

Chapter 5. The effect of air travel on platelets and the vessel wall 73

Chapter 6. Explanations for coagulation activation after air travel 87

Chapter 7. The effect of flight-related behaviour on the risk of venous thrombosis after air travel 103

Chapter 8. Mechanical prophylaxis for travellers' thrombosis: a comparison of three interventions that promote venous outflow 115
