The debates surrounding the theory and practice of citizenship have gained increased prominence in the last decade. They have been partially prompted by an increasing awareness of the role played by the civil society and its relationship to state apparatus. But the emergence of cross-border migration as a major feature of the post-Cold War era has also aided this phenomenon.

With a large number of individuals and groups migrating across the globe due to a variety of political, economic and social reasons, the role of the civil society and its relationship to state apparatus. The study of citizenship in the last ten years has also aided this phenomenon.

The role of Muslim women in Australia during the last century. They are also entrusted with the task of inter- action and articulation of identity? How signifi- cant is this role in defining their identity? These ideas raised a number of questions of equality, especially between women and men, and also between Muslim women and other women. The study of citizenship in the last ten years has also aided this phenomenon.
