INCREMENTAL VALUE OF ADVANCED CARDIAC IMAGING MODALITIES FOR DIAGNOSIS AND PATIENT MANAGEMENT

Focus on real-time three-dimensional echocardiography and magnetic resonance imaging

Nina Ajmone Marsan
The research described in this thesis was performed at the Department of Cardiology of the Leiden University Medical Center, Leiden, The Netherlands

Cover: Nina Ajmone Marsan

Lay-out and printing: Optima Grafische Communicatie, Rotterdam, The Netherlands

ISBN: 978-94-6169-133-0

# TABLE OF CONTENTS

General introduction and outline of the thesis 13

## PART I

### REAL-TIME THREE-DIMENSIONAL ECHOCARDIOGRAPHY

#### Chapter 1
Real-time three dimensional echocardiography: current and future clinical applications.
*Heart 2009*

#### Chapter 2
Real-time three-dimensional echocardiography as a novel approach to assess left ventricular size, function and dyssynchrony.

#### Part IA

#### Chapter 2
Predicting response to CRT. The value of two- and three-dimensional echocardiography.
*Europace 2008*

#### Chapter 3
Real-time three-dimensional echocardiography permits quantification of left ventricular mechanical dyssynchrony and predicts acute response to cardiac resynchronization therapy.
*J Cardiovasc Electrophysiol 2008*

#### Chapter 4
Real-time three-dimensional echocardiography as a novel approach to quantify left ventricular dyssynchrony: a comparison study with phase analysis of gated myocardial perfusion SPECT.
*J Am Soc Echocardiogr 2008*

#### Chapter 5
Usefulness of multimodality imaging for detecting differences in temporal occurrence of left ventricular systolic mechanical events in healthy young adults.
*Am J Cardiol 2009*

#### Chapter 6
Tri-plane tissue Doppler imaging: a novel 3-dimensional imaging modality that predicts reverse left ventricular remodeling after cardiac resynchronization therapy.
*Heart 2008*

#### Chapter 7
Left ventricular dyssynchrony assessed by two 3-dimensional imaging modalities: phase analysis of gated myocardial perfusion SPECT and tri-plane tissue Doppler imaging.
*Eur J Nucl Med Mol Imaging 2008*
**Chapter 8**
Noninvasive imaging of cardiac venous anatomy with 64-slice multi-slice computed tomography and noninvasive assessment of left ventricular dyssynchrony by 3-dimensional tissue synchronization imaging in patients with heart failure scheduled for cardiac resynchronization therapy.
*Am J Cardiol 2008*

**Part IB**
Real-time three-dimensional echocardiography for the assessment of left atrium volumes and function.

**Chapter 9**
Real-time three-dimensional echocardiography as a novel approach to assess left ventricular and left atrium reverse remodeling and to predict response to cardiac resynchronization therapy.
*Heart Rhythm 2008*

**Chapter 10**
Comparison of left atrial volumes and function by real-time three-dimensional echocardiography in patients having catheter ablation for atrial fibrillation with persistence of sinus rhythm versus recurrent atrial fibrillation three months later.
*Am J Cardiol 2008*

**PART II**
CONTRAST-ENHANCED ECHOCARDIOGRAPHY

**Chapter 11**
Safety of contrast-enhanced echocardiography within 24 h after acute myocardial infarction.
*Eur J Echocardiogr 2008*

**Chapter 12**
Real-time 3-dimensional echocardiography early after acute myocardial infarction: incremental value of echo-contrast for assessment of left ventricular function.
*Am Heart J 2009*

**Chapter 13**
Impact of left ventricular dyssynchrony early on left ventricular function after first acute myocardial infarction.
*Am J Cardiol 2010*

**Chapter 14**
Reduced left ventricular torsion early after myocardial infarction is related to left ventricular remodeling.
*Circ Cardiovasc Imaging 2010*
PART III MAGNETIC RESONANCE IMAGING

Part IIIA Magnetic resonance imaging for the assessment of left ventricular dyssynchrony and myocardial viability.

Chapter 15 Comparison between tissue Doppler imaging and velocity-encoded magnetic resonance imaging for measurement of myocardial velocities, assessment of left ventricular dyssynchrony, and estimation of left ventricular filling pressures in patients with ischemic cardiomyopathy.

*Am J Cardiol* 2008

Chapter 16 Magnetic resonance imaging and response to cardiac resynchronization therapy: relative merits of left ventricular dyssynchrony and scar tissue.

*Eur Heart J* 2009

Chapter 17 Agreement and disagreement between contrast-enhanced magnetic resonance imaging and nuclear imaging for assessment of myocardial viability.

*Eur J Nucl Med Mol Imaging* 2009

Chapter 18 Three-dimensional echocardiography for the preoperative assessment of patients with left ventricular aneurysm.

*Ann Thoracic Surg* 2011

Part IIIb Magnetic resonance imaging for the assessment of valvular heart disease.

Chapter 19 Mitral valve and tricuspid valve blood flow: accurate quantification with 3D velocity-encoded MR imaging with retrospective valve tracking.

*Radiology* 2008

Chapter 20 Quantification of functional mitral regurgitation by real-time 3D echocardiography: comparison with 3D velocity-encoded cardiac magnetic resonance.

*JACC Cardiovasc Imaging* 2009
## PART IV

**INCREMENTAL VALUE OF ADVANCED IMAGING MODALITIES IN CARDIAC RESYNCHRONIZATION THERAPY**

### Chapter 21

**Left ventricular rotational mechanics in acute myocardial infarction and in chronic (ischemic and nonischemic) heart failure patients.**

*Am J Cardiol 2009*

### Chapter 22

**Effects of cardiac resynchronization therapy on left ventricular twist.**

*J Am Coll Cardiol 2009*

### Chapter 23

**Cardiac resynchronization therapy as a therapeutic option in patients with moderate-severe functional mitral regurgitation and high operative risk.**

*Circulation 2011*

### Chapter 24

**Effect of cardiac resynchronization therapy on cerebral blood flow.**

*Am J Cardiol 2010*

### Chapter 25

**Cardiac resynchronization therapy in patients with ischemic versus non-ischemic heart failure: Differential effect of optimizing interventricular pacing interval.**

*Am Heart J 2009*

### Chapter 26

**Comparison of time course of response to cardiac resynchronization therapy in patients with ischemic versus nonischemic cardiomyopathy.**

*Am J Cardiol 2009*

**Summary and Conclusions**
