The research described in this thesis was performed at the Hubrecht Institute for developmental biology and Stem Cell Research, part of the Royal Dutch Academy of the Arts and Sciences (KNAW), within the framework of the Graduate School of Cancer, Genomics and Developmental Biology (CGDB) in Utrecht, the Netherlands and Leiden University Graduate School of Science in Leiden, the Netherlands. This work was in part supported by a Marie Curie Research Training Network Grant (PTPNET/MRTN-CT-2006-035830).
