**Author**: Linde, Sjoerd Jaap van der  
**Title**: Digging holes abroad. An ethnography of Dutch archaeological research projects abroad  
**Issue Date**: 2012-12-18
Appendix

Original outline of semi-structured interviews

This original list of themes and questions formed the basis of an iterative interview process, whereby they were adapted in the field in relation to specific respondents and research issues. The questions are by no means exhaustive, and merely functioned as an inspiration for discussion (see section 3.2.2).

1. Introduction
   - Introduction of the author and outline of research
   - Research ethics

2. Factual/Personal
   - Personal and institutional background
   - Personal involvement with project
   - Institutional involvement with project

3. Experiential
   - Motivations and project policies
     - How did you become involved in the project?
     - What did you – and/or your institution – wish to accomplish with the project?
     - Did these motivations/objectives change during the course of the project?
     - What would you like to accomplish with the project in the future?
   - Causal chains and key events
     - Can you describe to me how the project has evolved during your involvement?
     - What were, in your opinion, determining factors and events during the project?
   - Collaboration
     - Who were involved in this project?
     - How would you describe the collaboration on this project?
     - Who else would you like to see involved?
   - Project outcomes
     - How far do you see your objectives/motivations represented and implemented by the project?
     - Do you consider the project a success?
     - What have you learned during this project?

4. Conceptual
   - Research
     - Do you think archaeology is important?
     - How should archaeology be conducted, and with what purpose?
     - What periods/places should be investigated?
   - Heritage management
     - Is the site important to you? Why?
     - What should happen to the site?
     - What does the word ‘heritage’ mean to you?
   - Collaboration
     - Who should be involved in the archaeological process?
     - Who should make decisions on archaeological sites?
     - What advice would you give to foreign archaeologists?

5. Conclusions
   - Is there anything else you’d like to tell me?
   - Who else should I talk to?
