Author: Clerbout, Nicolas  
Title: Etude sur quelques sémantiques dialogiques : concepts fondamentaux et éléments de metathéorie  
Issue Date: 2013-12-19
Stellingen

Nicolas Clerbout

1. The dialogical framework offers a promising alternative approach for semantics. (Dissertation, ch. 1, 4, 5, 6)

2. A good dialogical system ensures finiteness of plays. (Diss. ch. 1, 2)

3. In the case of propositional, first-order and various modal languages, tableaux are sound and complete with respect to the respective dialogical semantics with finiteness of plays. (Diss. ch. 2, 4, 5, 6)

4. The device of repetition ranks is useful for the study of general properties of games, in particular regarding decidability. (Diss. ch. 2, 3)

5. Games and considerations about strategies in games should be carefully kept apart. (Logic, games)

6. Papers that present single dialogues as proofs must not be published. (Logic, games)

7. Relational "Kripke" semantics, in relation to logical and natural language modalities, is not very convincing. (Logic, language, modalities)

8. "It is by logic that we prove, but by intuition that we discover". (H. Poincaré) (Logic)

9. LaTex is superior to MS Word or other similar word processors and should therefore be preferred.

10. Overall, Go is superior to Chess.

11. The noble sentiment "We are confident this seminar will be intellectually stimulating for you" is best expressed by a display of implements that help you stay awake.
