Tissue Doppler and speckle tracking strain echocardiography

From evaluation in healthy children to follow-up after surgery for a congenital heart defect

te Rotterdam
PROMOTIECOMMISSIE

Promotor: Prof. Dr. N.A. Blom

Co-Promotor: Dr. A.D.J. ten Harkel

Overige leden: Prof. Dr. F.J. Walther
Prof. Dr. M.G. Hazekamp
Prof. Dr. L. Kapusta (E. Wolfson Medical Center, Holon, Israel)
CONTENTS

1. General introduction 9

2. Review: Ventricular performance after surgery for a congenital heart defect as assessed using advanced echocardiography: from Doppler flow to 3D echocardiography and speckle-tracking strain imaging 15

3. Echocardiography in healthy pediatric subjects
   3.1. Longitudinal follow-up of ventricular performance in healthy neonates 41
   3.2. Assessment of intraventricular time-differences in healthy children using 2-dimensional speckle tracking echocardiography 57

4. Echocardiographic follow-up after surgical correction of a congenital heart defect
   4.1. Tissue Doppler imaging detects impaired biventricular performance shortly after congenital heart defect surgery 81
   4.2. Disparity in right versus left ventricular recovery during follow-up after ventricular septal defect correction 99
   4.3. Left and right ventricular performance after arterial switch operation 115
   4.4. Enhanced characterization of ventricular performance following coarctation repair in neonates and young children 133

5. General discussion and future perspectives 153

6. Dutch summary / Nederlandse samenvatting 165
7. Appendices
   7.1. Abbreviation list
   7.2. Authors & affiliations
   7.3. Dankwoord
   7.4. List of publications
   7.5. Curriculum Vitae
