This information was compiled by Marion Eeckhout and Nel de Vink.

The main map is based on the World Bank’s breakdown of developing countries into the following categories: ‘Low Income Countries’ with a Gross National Income (GNI) per capita of less than 950 US$, Lower Middle Income Countries with a GNI per capita up to US$ 3,975 and Upper Middle Income countries with a GNI per capita up to US$ 12,275. N.B. The OECD/DAC and UNCTAD use a slightly different category for so-called ‘Least Developed Countries’. These have a low GNI per capita and additionally are considered particularly vulnerable to economic and political shocks and to low integration in world trade markets. Most countries in Sub-Saharan Africa that qualify as LIC’s are also LLDC with the exception of Kenya. The categories of ‘public flows’ on the map consist of ODA (Official Development Assistance) which is recorded by the OECD/DAC in its development-aid statistic database. This consists of grants, donations and very-concessional lending from bilateral and multilateral public organizations, vs. Other Official Flows (OOF) and Non-Traditional Development Assistance (NTDA), i.e. less-concessional lending and non-conventional mechanisms of financing.
The maps on the present front present a bird’s-eye view of the trends in the volume and composition of cross-border financial flows to developing countries over the past decade in general and to Sub-Saharan Africa in particular. To put the modest size of cross-border flows into a realistic perspective, volumes of domestic tax revenues are presented too. These numbers serve as a reminder of the reality on the ground in an era when new ambitions are on the verge of being formulated in the run-up to the ‘Beyond 2015 Summit’ that will be held at the end of 2015 when a new set of Sustainable Development Goals will be negotiated.

Millennium Declaration and Monterrey Consensus

The principle of international consensus was celebrated at the Millennium Declaration in 2000 and the Monterrey Consensus on Financing for Development in 2002 when the set of seven MDGs was agreed upon. The eighth formed part of a renewed global partnership that aimed to deliver on the financing needs for achieving the seven MDGs by 2015. The international commitment among OECD countries to spend 0.7% of their GNI (gross national income) on Official Development Assistance (ODA) was replaced by a pledge to double ODA resources by 2015, which was in fact met by 2010. Concurrently, the commitment to increase ODA resources to Sub-Saharan African countries by US$ 65 bn annually has nearly been achieved. Admittedly, this was largely as a result of bilateral donors taking over debt service commitments to multilateral organizations (better known as the HIPC and MDI initiatives) at a time of roughly US$ 120 bn. At present 23 LICs have reached the HIPC completion point which is a condition required before releasing US$ 80 bn and 6 MICs have qualified for an amount of US$ 40 bn. However, this impulse had tapered out by 2007 and 2008.

Observations for the overall group of developing countries

The overall trend is positive and by 2010 the total volume of financial flows for development had increased by more than had been expected in 2000. Yet, the overall growth of financial flows, changes in the composition of flows are emerging. First of all, the volume of private flows relative to public flows from a commercial or non-commercial origin is increasing. This is considered as a positive sign of growing confidence among private actors in a more conducive economic and institutional environment in developing countries in general. The number of countries qualifying as LICs is up on the rise and is considered more attractive and less risky for private-sector financiers. The third positive message is that countries in Sub-Saharan Africa are exhibiting the same trends as the overall group of developing countries, but with a different emphasis as explained below.

Financial flows and their composition

These infographics are based on statistical material in a background paper for the Financing for Development Conference that will be held in Addis Ababa in July 2015 entitled: Stocktaking of Financial Flows to Developing Countries Ten Years Into the MDGs Declaration by M. J. Eeckhout (MINBUZA/DMM-IF/08/08/14) and Stocktaking of Financial Flows to Sub-Saharan African Countries for the MDGs: Preparatory Meeting for the Same PFD Ten Years Summit, also by M. J. Eeckhout (MINBUZA/DMM-IF/07/03/14 forthcoming).

The African Studies Centre (ASC)

The ASC in Leiden, founded in 1947, is the only research institute in the Netherlands devoted entirely to the study of Africa. Its primary aims are to undertake scientific research on Africa in the social sciences and humanities and to promote a better understanding of African societies. It is an independent institute that maintains close links with Leiden University, as part of LeidenGlobal. The ASC’s work is not only of importance to researchers but also to policymakers, NGOs, businesses and other organizations.

Research

The ASC’s research programme lasts for a period of five years. Projects are multidisciplinary, empirical in nature and are carried out in cooperation with African colleagues and institutions by the Centre’s researchers and PhD and Research Masters students.

Library

The ASC’s Library, Documentation and Information Department has the most extensive and specialized collection on Africa in the Netherlands on the fields of the social sciences (including law and economics) and the humanities. The library, which is open to the general public, has more than 80,000 books, 1,500 documentaries and feature films from and about Africa, and subscribes to nearly 750 periodicals. African Studies Abstracts Online offers some 10,000 abstracts and journal articles and web-dossiers provide background information on specific topical events and themes.

Publications

ASC researchers publish in many different journals and with well-known publishing houses. The Centre also has five publication series of its own: Africa Yearbook, Africa-Studiecentrum Series, African Dynamics, African Studies Collection and African Studies Journal.

Seminars

Regular seminars are held at the ASC on Thursday afternoons on a wide range of topics. These are given by prominent local and international Africanists and are open to the general public.

Visiting Fellows

Eight African academics are invited to Leiden every year on three-month fellowships to promote an effective academic dialogue between Africa and the North. These scholars use their stay in Leiden for data analysis and writing.

Research Masters in African Studies

The ASC offers a two-year Research Masters in African Studies in cooperation with Leiden University’s Faculty of Humanities and the Faculty of Social Sciences. About 60% of the students on this course come from outside the Netherlands.

Thesis Award

The ASC annually awards the best thesis on Sub-Saharan Africa by a student at a university in the Netherlands or in Africa. The winning thesis is published in the African Studies Collection series.

ASC Community

The ASC Community includes fellows, affiliates and associates of the Centre, and people with a professional interest in Africa who are working in business, policymaking, NGOs and in media circles. We would like to welcome you as a partner in the ASC Community.
