CURRICULUM VITAE

Dr. Gaetano Nucifora was born on October 27th, 1976 in Udine, Italy. He obtained his high school diploma in 1995 from Liceo Classico “Jacopo Stellini” in Udine, Italy. In 2002, he graduated cum laude from the Medical School at the University of Udine, Italy and in 2006 he completed his Cardiology training at the University of Trieste, Italy. After a three-month period as consultant cardiologist at the Hospital of Gorizia, Italy, he underwent a two-year cardiac imaging research fellowship at Leiden University Medical Center, Leiden, the Netherlands under the mentorship of Prof. Dr. Jeroen J. Bax. He then underwent a one-year fellowship consisting of clinical cardiac magnetic resonance imaging training at the Fondazione CNR/Regione Toscana Gabriele Monasterio, Pisa, Italy. In 2010 dr. Nucifora was appointed as senior researcher in cardiovascular imaging at the Fondazione Cardiocentro Ticino, Lugano, Switzerland and in 2011 as consultant cardiologist at the University Hospital “Santa Maria della Misericordia”, Udine, Italy. His primary clinical and research areas of interest include novel echocardiographic techniques for the assessment of myocardial mechanics and the evaluation of cardiac anatomy and valvular function and the application of non-invasive cardiac imaging techniques (real-time 3D transesophageal echocardiography, cardiac magnetic resonance and cardiac computed tomography) to clinical cardiac electrophysiology.
ACKNOWLEDGMENTS

I would like first to thank prof. Paolo M. Fioretti (past director of the Cardiology Department of the University Hospital of Udine, Italy), dr. Luigi P. Badano (past director of the echo-lab of the University Hospital of Udine, Italy) and prof. Ugolini Livi (director of the Cardiac Surgery Department of the University Hospital of Udine, Italy) who proposed me to come to Leiden to work under the supervision of Prof. Jeroen J. Bax and helped and supported me during this two-year fellowship.

This thesis was also possible thanks to all the friends, colleagues and staff I had the opportunity to meet and work with at the Department of Cardiology of the Leiden University Medical Center. In particular, I cannot forget Victoria, Nina, Matteo, Arnold, Rutger, Miriam and Agnieszka; thank you for the nice discussions we had, for your advices and support, and for your friendship. Also, thanks to to Philippe van Rosendael for the precious help.

Finally, I would like to thank my wife Fjoralba and my mama, for their love, support and encouragement during my foreign experience and my papa, my first teacher and protector through my life.
