**Author:** Ercan, Ayşe Ece  
**Title:** Diffusion-weighted MRS and MRI: methods and neuro applications  
**Issue Date:** 2015-12-16
List of publications

Ayşe Ece Ercan was born on 31st of July 1983 in Istanbul, Turkey. In 2004, she graduated from Robert College of Istanbul. In 2008, she completed her BSc. degree in Physics at Boğaziçi University with honors and started the Biomedical Engineering Master Program at Delft University of Technology. She conducted her master thesis research at the division of image processing (LKEB), Department of Radiology, Leiden University Medical Center. In 2010, she received her MSc. degree in Biomedical Engineering from Delft University of Technology. In 2011, she started her PhD at C.J. Gorter Center for high field MRI, Department of Radiology, Leiden University Medical Center. Upon the completion of her PhD, she will start conducting post-doctoral research at the Radiology Department of University of Texas Southwestern Medical Center.
I would like to take the opportunity to thank everyone who was involved in the realization of this thesis: Itamar Ronen, Andrew Webb, Mark van Buchem, Tom Huizinga, César Magro-Checa, Bart Emmer, Jasper Luyendijk, Margreet Steup-Beekman, Liesbeth Beaart-vande Voorde, Emily Wood, Francesca Branzoli, Sophie Schmid, Thijs van Osch, Oranan Tritanon, Carson Ingo, Maarten Versluis, Aranee Techawiboonwong, Wouter Teeuwisse, Iris Asllani, Matthijs Buijs, Nathalie Doorenweerd, Hermien Kan, Gerda Labadie, Michèle Huijberts, Led Zeppelin and Franz Ferdinand. Dear Itamar and Andrew, I feel very lucky to have had the chance to work with you. I learned a great deal about life and science from both of you. Everybody in Gorter Center and LKEB, I am really thankful to you for making the last 5 years really enjoyable, ‘gezellig’ and a lot of fun. I would like to thank Thijs van Osch and Sophie Schmid also for the Dutch summary. Vikas Gupta and René Hiemstra for helping with the layout and Sezin Beldağ for all the time and effort that she put in preparing the cover of this thesis. Çocuklar, Müge and Hilal, thank you for all your endless support and making me feel at home in Leiden. Asena, Ahu, Esra, Belgin, Barış, Tanju, Berrin, Damla, Jale and Meriç, I always felt your presence no matter how far I went so far. Ans, Rinke, Miriam, Erwin, Hendrik and Jeltsje, thank you for being my family here. Dear René, thanks a lot for always being there and taking care of me. Lastly, without the ‘tea sessions’, this thesis would have never existed, I am really grateful for them.
