# Table of Contents

List of Abbreviations

## Chapter 1
Manganese and Iron Complexes in Biomimetics, Oxidation Catalysis and Cluster Chemistry

1.1 Introduction ........................................... 1
1.2 Manganese in Biomimetic Chemistry ............. 1
1.3 Iron in Biomimetic Chemistry .................. 8
1.4 Manganese and Iron in Biomimetic Oxidation Catalysis 11
1.5 Magnetochemistry of Manganese and Iron Clusters 20
1.6 Objectives and Outline of the Thesis ............ 23
1.7 References ......................................... 25

## Chapter 2
Highly Efficient Disproportionation of Dihydrogen Peroxide: Synthesis, Structure, and Catalase Activity of Manganese Complexes of the Salicylimidate Ligand

2.1 Introduction ......................................... 32
2.2 Experimental Section ............................... 33
2.3 Results and Discussion ............................ 36
2.4 Concluding Remarks ............................... 50
2.5 References ......................................... 50

## Chapter 3
Stereochemical Influence of the Ligand on the Structure of Manganese Complexes; Implications for Catalytic Epoxidations

3.1 Introduction ......................................... 54
3.2 Experimental Section ............................... 56
3.3 Results and Discussion ............................ 61
3.4 Concluding Remarks ............................... 82
3.5 References ......................................... 83

## Chapter 4
Structural Studies of ‘Fe(phox-R)’ Complexes and Use in Catalytic Oxidations

4.1 Introduction ......................................... 86
4.2 Experimental Section ............................... 87
4.3 Results and Discussion ............................ 89
4.4 Concluding Remarks ............................... 96
4.5 References ......................................... 96
