PHOTO-ELECTRIC OBSERVATIONS OF THE SHORT-PERIOD ECLIPSING BINARY V 502 OPHIUCHI MADE IN 1955 AND 1956

K. K. KWEE
Communication from the Observatory at Leiden

In this paper 1179 one-colour photo-electric observations of V 502 Oph, made in 1955 and 1956, are presented. Nine epochs of minimum have been derived from this material. Some of the minima appear to be asymmetric.
