Title: Pacing in heart failure: focus on risk stratification and patient selection for cardiac resynchronization therapy

Issue Date: 2018-04-10

Pacing in Heart Failure:

**Focus on Risk Stratification and Patient Selection
for Cardiac Resynchronization Therapy**

Ulaş Höke

The studies described in this thesis were performed at the Department of Cardiology of the Leiden University Medical Center, Leiden, the Netherlands.

PROMOTIECOMMISSIE

Promotores: Prof. dr. J.J. Bax
Prof. dr. M.J. Schalij

Co-promotor: Dr. N. Ajmone Marsan

Leden promotiecommissie

Prof. dr. Fausto J. Pinto (Head of the Department the Cardiology and Department of Heart and Vascular, University Hospital of Santa Maria/CHLN, Lisbon, Portugal and Dean of the Faculty of Medicine, University of Lisbon, Portugal)

Prof. dr. R.J.M Klautz

Prof. dr. H.J.J. Wellens (Emeritus hoogleraar Universiteit Maastricht, Maastricht, The Netherlands)

Dr. V. Delgado

Dr. P.R.M. van Dijkman (Department of Cardiology, Haaglanden Medisch Centrum, The Hague, The Netherlands)

4 Financial support by the Dutch Heart Foundation for the publication of this thesis is greatly acknowledged.

Aan mijn ouders, Mehtap, Ela en Lara

TABLE OF CONTENTS

Chapter 1	General introduction and outline of the thesis.	11
Part I:	Pacemaker Therapy And Development Of Heart Failure	23
Chapter 2	Significant lead-induced tricuspid regurgitation is associated with poor prognosis at long-term follow-up. <i>Heart. 2014 Jun;100(12):960-968</i>	25
Part II:	Cardiac Resynchronization Therapy In Subpopulations Under-Represented In Heart Failure Randomized Clinical Trials	45
Chapter 3	Cardiac resynchronization therapy in populations underrepresented in randomized controlled trials. <i>Heart. 2015 Feb;101(3):230-239</i>	47
Chapter 4	Influence of diabetes on left ventricular systolic and diastolic function and on long-term outcome after cardiac resynchronization therapy. <i>Diabetes Care. 2013 Apr;36(4):985-991</i>	71
Chapter 5	Cardiac resynchronization therapy in CKD stage 4 patients. <i>Clin J Am Soc Nephrol. 2015 Oct 7;10(10):1740-1748</i>	89
Chapter 6	Left ventricular reverse remodeling, device-related adverse events, and long-term outcome after cardiac resynchronization therapy in the elderly. <i>Circ Cardiovasc Qual Outcomes. 2014 May;7(3):437-444</i>	107
Chapter 7	Right ventricular function and survival following cardiac resynchronization therapy. <i>Heart. 2013 May;99(10):722-728</i>	129
Chapter 8	Predictors of long-term benefit of cardiac resynchronization therapy in patients with right bundle branch block. <i>Eur Heart J. 2012 Aug;33(15):1934-1941</i>	147
Part III:	Optimization Of Patient Selection And Risk Stratification In Cardiac Resynchronization Therapy Management	165
Chapter 9	Usefulness of the CRT-SCORE for Shared Decision Making in Cardiac Resynchronization Therapy in Patients With a Left Ventricular Ejection Fraction of $\leq 35\%$. <i>Am J Cardiol. 2017 Dec 1;120(11):2008-2016</i>	167

Chapter 10	Assessment of left ventricular dyssynchrony by three-dimensional echocardiography: prognostic value in patients undergoing cardiac resynchronization therapy. <i>Accepted for publication in J Cardiovasc Electrophysiol. 2018</i>	185
Chapter 11	Relation of myocardial contrast-enhanced T1 mapping by cardiac magnetic resonance to left ventricular reverse remodeling after cardiac resynchronization therapy in patients with non-ischemic cardiomyopathy. <i>Am J Cardiol. 2017 May 1;119(9):1456-1462</i>	203
Chapter 12	Summary, Conclusions and Future Perspectives	219
Chapter 13	Samenvatting, Conclusies en Toekomstperspectief	229
	List of publications	239
	Dankwoord	243
	Curriculum Vitae	245
