**Author:** Aghajani, Moji  
**Title:** The juvenile antisocial brain : brain imaging studies in clinically antisocial youth with nascent psychopathic traits  
**Date:** 2018-01-23
The Juvenile Antisocial Brain

Brain Imaging Studies In Clinically Antisocial Youth
With Nascent Psychopathic Traits

Moji Aghajani
Promotores
Prof. Dr. R.R.J.M. Vermeiren
Prof. Dr. N.J.A. van der Wee

Copromotor
Dr. O.F. Colins

Promotiecommissie
Prof. Dr. H.G.J.M. Vermetten
Prof. Dr. E.A.M. Crone
Prof. Dr. J.K. Buitelaar (Radboud University)
Prof. Dr. F.L. de Leeuw (Maastricht University & WODC)

TABLE OF CONTENTS
Chapter 1  7  General Introduction
Chapter 2  27  Disorganized amygdala networks in conduct-disordered juvenile offenders with callous-unemotional traits
Chapter 3  59  Abnormal functional architecture of amygdala-centered networks in adolescent posttraumatic stress disorder
Chapter 4  93  Dissociable relations between amygdala subregional networks and psychopathy trait dimensions in conduct-disordered juvenile offenders
Chapter 5  129  Interactions between oxytocin receptor gene methylation and callous-unemotional traits impact socioaffective brain systems in conduct-disordered offenders
Chapter 6  175  Perturbed neural processing of socioemotional information in conduct-disordered juvenile offenders with limited prosocial emotions
Chapter 7  203  General Discussion
Chapter 8  225  References
247  Dutch summary
252  Acknowledgement
254  Curriculum vitae
255  Publications
