Author: Brink, W.J. van den

Title: Multi-biomarker pharmacokinetic-pharmacodynamic relationships of central nervous systems active dopaminergic drugs

Issue Date: 2018-11-21

**Multi-Biomarker Pharmacokinetic-Pharmacodynamic
Relationships of Central Nervous Systems Active
Dopaminergic Drugs**

Willem van den Brink

Ph.D. Thesis, Leiden University, November 2018

The research described in this thesis was performed at the division of Pharmacology of the Leiden Academic Centre for Drug Research, Leiden University, The Netherlands

Part of this work was financially supported by Shionogi & Co, Ltd., Japan.

**Multi-Biomarker Pharmacokinetic-Pharmacodynamic Relationships of Central Nervous
Systems Active Dopaminergic Drugs**

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden
op gezag van Rector Magnificus prof. mr. C.J.J.M. Stolker,
volgens besluit van het College voor Promoties
te verdedigen op woensdag 21 november 2018
klokke 11:15 uur

door

Willem Johan van den Brink
geboren te Rhenen, Nederland
op 7 juni 1989

Promotoren:

Prof. dr. E.C.M. de Lange
Prof. dr. P.H. van der Graaf
Prof. dr. T. Hankemeier

Promotiecommissie:

Prof. dr. H. Irth, voorzitter
Prof. dr. Joke Bouwstra , secretaris
Prof. dr. I.F. Trocóniz, Universidad de Navarra, Spain
Prof. dr. A.K. Smilde, Universiteit van Amsterdam
Dr. R.M. Fleming, Universiteit Leiden
Dr. H.M. Wortelboer, The Netherlands Organization
for Applied Scientific Research

Table of Contents

SECTION I – GENERAL INTRODUCTION

Chapter 1.	Dynamical analysis of blood-based systems biomarkers of central nervous system (CNS) drugs – scope and intent of investigations	7
Chapter 2.	Bundling arrows: improving translational CNS drug development by integrated pharmacokinetics/pharmacodynamics (PK/PD)-metabolomics	13
Chapter 3.	Access to the CNS: biomarker strategies for dopaminergic treatments	37

SECTION II – THE DYNAMICAL NEUROENDOCRINE SYSTEMS RESPONSE TO STUDY DOPAMINE D₂ DRUG EFFECTS

Chapter 4.	Revealing the neuroendocrine response after remoxipride treatment using multi-biomarker discovery and quantifying it by PK/PD modeling	77
Chapter 5.	Fingerprints of CNS drug effects: a plasma neuroendocrine reflection of D ₂ receptor activation using multi-biomarker PK/PD modeling	103

SECTION III – THE DYNAMICAL BIOCHEMICAL SYSTEMS RESPONSE TO STUDY DOPAMINE D₂ DRUG EFFECTS

Chapter 6.	Multivariate pharmacokinetic/pharmacodynamic (PK/PD) analysis with metabolomics shows multiple effects of remoxipride in rats	133
Chapter 7.	Blood-based biomarkers of quinpirole pharmacology: multivariate PK/PD and metabolomics to unravel the underlying dynamics in plasma and brain	161

SECTION IV – GENERAL DISCUSSION AND CONCLUSION

Chapter 8.	General discussion and conclusion	185
