Leiden Ethnosystems and Development Programme (LEAD) Studies No. 10  
Faculty of Science, Leiden University, The Netherlands.

*'Cageur, Bageur, Bener, Pinter, Teger, Singer, Wanter, Pangger, Cangker'.*

*Cageur, manusia yang sehat jasmani dan rohani,  
Bageur, bermoral, tahu tata krama, tahu sopan santun,  
Bener kepatuhan terhadap aturan,  
Pinter, cerdas dalam penguasaan ilmu pengetahuan dan teknologi,  
Teger, memiliki kepribadian yang kuat,  
Singer, keterampilan,  
Wanter, keberanian,  
Pangger, kekukuhan,  
Cangker, sehat jasmani dan kuat, siap setiap saat.*

*'Healthy, Good, Correct, Clever, Adept, Wise, Consistent, Strong'.*

*Healthy, a person who is healthy, both spiritually and physically,  
Good, behave with integrity, know how to behave,  
Correct, obey the rules,  
Clever, smart in mastering knowledge and technology,  
Teger means to have strong personality,  
Adept, skilful,  
Wise, brave and confident with polite manners,  
Consistent and committed,  
Strong, having physical health and power, so is ready at all times.*

*(Traditional Sundanese Philosophy of Life)*

This dissertation is dedicated to the people of Sukamiskin, who have shared their health experiences with me, as well as to the memory of my beloved father, who has inspired me to execute this study, to my mother, sister and brother whom I thank for their prayers, and to my beloved son and daughter who have always supported me during my studies.

## Preface

The origin of this study started from my personal experience with knowledge and practice in health, which later evolved in health information. Since my childhood, my parents had always involved me in their handling of health problems in the family, where I was always keen to know how to use a particular medicine recommended by the doctor such as *e.g.* the method of reducing high fever with traditional herbs. The philosophy of my family's education made me an individual with a strong feeling to care for people around me.

Generally speaking, most Indonesians are facing many obstacles to get access to personal health information. The difficulties are especially related to the problems they encounter when they fall ill, and do not know where they should go. The provision of adequate health information is most important for the health and well-being of the people, in which the government has to play an important role, especially at the community level. As I regard it as my contribution to know more about the various forms of traditional and modern health information and communication, I decided to study these phenomena in Indonesia as my main interest. After my education in communication, library and information science, I completed my Master Degree in Anthropology at Leiden University, and when I got the chance to continue my PhD research, I seized the opportunity to focus my study on health information and communication in the Sunda region of West Java from an ethno-communication point of view.

Moreover, this is a new field which also needs further development at the Department of Library Science of the Faculty of Communication of Padjadjaran University (UNPAD) in Bandung. Since this kind of research encompasses a multidisciplinary approach, it could also serve as a reference for related fields such as Health Education and Communication, Public Health, Preventive Medicine and Promotive Health. As the complex area of health and disease is basically a joint responsibility for scientists, practitioners and experts, it is not merely the responsibility of modern doctor's, nurses, birth attendants and traditional healers, but also involves a whole range of experts from among various related disciplines. Hence, as a researcher and educator working in the information and communication field, I have felt it as my mission to further document, study and understand the process of information and communication in the area of health at the community level, and try to understand the utilisation patterns of the existing different information systems by the local people at the community level.

The realisation of my mission and the opportunity to execute my research in ethno-communication in the community of Sukamiskin have given me further in-depth knowledge of local peoples' understanding and utilisation of both traditional and modern medicine, which is most relevant for them in order to maintain their health and well-being in their community.

In this way, I wish to express my hope that the multidisciplinary approach which I developed as the foundation of this study through the LEAD Programme of Leiden University in The Netherlands, and which as such pertained to my dissertation on '*Iber Kasehatan* in Sukamiskin: Utilisation of the Plural Health Information & Communication System in the Sunda Region of West Java, Indonesia', will not only contribute to the development of the field of health information and communication, but also to the benefit of the local communities through applied-oriented policy planning and implementation of appropriate health information and communication systems in both urban and rural areas throughout the country.

## **Acknowledgements**

Following the *mores* of Leiden University to refrain here from acknowledging the contribution and support from my Supervisors, Members of the committee and colleagues affiliated with Leiden University, including the LEAD Programme, I have to confine in general terms my deep gratitude to them all for their kind encouragement and support for the realization of my study in the Sundanese community of Sukamiskin in West Java, Indonesia.

I take the opportunity to thank my family, friends and colleagues both in Indonesia and The Netherlands, and in particular the local people from Sukamiskin for their continuing support without which this study would not have been possible.

<b>Chapter I INTRODUCTION</b>	1
<b>1.1 Health Information and Communication in Indonesia</b>	1
1.1.1 The New Field of Health Information & Communication (HIC)	1
1.1.2 Health Information Systems (HIS) for Improved Health Services	3
1.1.3 Application of Information & Communication Technology (ICT) in Health	5
<b>1.2 Plural Health Information &amp; Communication Systems (PHICS)</b>	8
1.2.1 The Concept of a Health Information & Communication System (HICS)	8
1.2.2 Traditional Health Information & Communication Systems (THICS)	9
1.2.3 Modern Health Information & Communication Systems (MHICS)	11
<b>1.3 Utilisation of Plural Health Information &amp; Communication Systems (PHICS)</b>	13
1.3.1 The Ethnoscience Perspective on Health Information Utilisation	13
1.3.2 <i>Reformasi</i> : The Era of Extension of Public Information in Indonesia	16
1.3.3 The Development Information and Communication in Indonesia	18
1.3.4 <i>Indonesia Sehat 2015</i> : Towards a Health Care Strategy	20
<b>1.4 Aim and Objectives of the Study</b>	22
1.4.1 General Aim and Specific Objectives	22
1.4.2 Structure of the Study and Arrangement of the Dissertation	23
<b>Notes</b>	24
<b>Chapter II THEORETICAL ORIENTATION</b>	27
<b>2.1 Health Information</b>	27
2.1.1 The Concept of Health Information	27
2.1.2 Health Information Literacy	30
2.1.3 Health Education: A One-way Transfer of Information	34
<b>2.2 Health Communication</b>	35
2.2.1 The Process of Health Communication	35
2.2.2 Communication and Health Promotion	36
2.2.3 Health Communication: An Interactive Process	37
<b>2.3 Plural Health Information &amp; Communication Systems (PHICS)</b>	39
2.3.1 Traditional Health Information & Communication Systems (THICS)	39
2.3.2 Modern Health Information & Communication Systems (MHICS)	42
2.3.3 The Theory of Development Communication	43
<b>2.4 Utilisation of Plural Health Information &amp; Communication Systems (PHICS)</b>	45
2.4.1 The Need of Understanding Local Utilisation Patterns of PHICS	45
2.4.2 Towards an Integrated Health Information & Communication System (IHICS)	46
<b>Notes</b>	48

<b>Chapter III METHODOLOGY AND ANALYTICAL MODEL</b>	51
<b>3.1 Selected Research Methodology</b>	51
3.1.1 The ‘Leiden Ethnosystems Approach’	51
3.1.2 The Selection of the Research Setting	54
3.1.3 The Choice of the Sample Surveys	55
<b>3.2 Complementary Qualitative and Quantitative Surveys</b>	56
3.2.1 Preparation of the Field Research	56
3.2.2 The Qualitative Study in Sukamiskin	56
3.2.3 The Design of the Structured Questionnaire	57
<b>3.3 Construction of the Conceptual Model and its Components</b>	58
3.3.1 The Utilisation Model of Health Information & Communication Systems (HICS)	58
3.3.2 Operationalisation of the Conceptual Model	59
3.3.3 Selection of the Stepwise Statistical Data Analysis	64
Notes	64
<b>Chapter IV RESEARCH SETTING: INDONESIA AND THE SUNDA REGION</b>	67
<b>4.1 Synopsis of the Culture Area of Indonesia</b>	67
4.1.1 Indonesia: Geographical and Historical Background	67
<b>4.2 The Province of West Java</b>	70
4.2.1 The City of Bandung	72
<b>4.3 The Community of Sukamiskin</b>	75
4.3.1 Sukamiskin: A Typical Sundanese Urban Community	75
Notes	76
<b>Chapter V LIFE IN THE COMMUNITY OF SUKAMISKIN</b>	79
<b>5.1 The Study and Sample Population</b>	79
5.1.1 Official Statistical Data of Sukamiskin	79
<b>5.2 Geography and Location</b>	81
5.2.1 Environment of Sukamiskin	81
5.2.2 Public Facilities in Sukamiskin	84
<b>5.3 Socio-Demographic and Economic Structure</b>	88
5.3.1 Age, Gender, Family and Household Composition	88
5.3.2 Occupation and Socio-Economic Status (SES)	89
<b>5.4 The Plural Medical System</b>	90
5.4.1 The Traditional Medical System	90
5.4.2 The Modern Medical Systems	97
Notes	99
<b>Chapter VI TRADITIONAL HEALTH INFORMATION &amp; COMMUNICATION SYSTEM (THICS)</b>	101
<b>6.1 Indigenous Sundanese Belief Systems</b>	101
6.1.1 The Cosmivision of the Sundanese People	101
6.1.2 The Sundanese Way of Life	104
<b>6.2 Traditional Medical Concepts of the Sundanese Culture</b>	105
6.2.1 Health and Illness in the Sundanese Culture	105
6.2.2 The Influence of Islam on Health and Healing	109
6.2.3 <i>Ubar Kampung</i> : Indigenous Health Promotion, Disease Prevention and Treatment	110

6.2.4 <i>Lalab</i> :Raw Vegetable Dish of the Sundanese People	117
<b>6.3 Traditional Sundanese Information &amp; Communication Systems</b>	121
6.3.1 Information & Communication among the Sundanese People	121
6.3.2 Traditional Information & Communication Systems (THICS)	123
6.3.3 Utilisation of Health Information and Communication Systems (HICS)	128
Notes	130
<b>Chapter VII MODERN HEALTH INFORMATION &amp; COMMUNICATION SYSTEM (MHICS)</b>	131
<b>7.1 Public Health Education and Promotion in Indonesia</b>	131
7.1.1 The Strategy of ‘Better Health for Indonesia’	131
7.1.2 Policies Regarding Public Health Promotion	132
7.1.3 Public Health Promotion in Sukamiskin	135
<b>7.2 Recent Decentralisation of Health Education and Promotion</b>	139
7.2.1 Public Health Promotion and Regional Autonomy	139
7.2.2 Community Health Education and Promotion in Sukamiskin	140
7.2.3 Partnerships in Health Information & Communication	142
<b>7.3 Modern Health Information &amp; Communication Systems (MHICS)</b>	145
7.3.1 Health Education through Institutions and Organisations	145
7.3.2 New Channels of Modern Health Information & Communication	148
7.3.3 The Progress of Digitisation: Radio, TV, Newspapers and the Internet	150
Notes	155
<b>Chapter VIII PATTERNS OF UTILISATION OF THE PLURAL HEALTH INFORMATION &amp; COMMUNICATION SYSTEM (PHICS)</b>	157
<b>8.1 Bivariate and Mutual Relations Analysis</b>	158
8.1.1 Preparation of the Analysis: Data Sets and Variables	158
<b>8.2 Results of the Bivariate Analysis</b>	161
8.2.1 Predisposing Variables	162
8.2.2 Enabling Variables	164
8.2.3 Perceived Need of Health Information Variables	164
8.2.4 Institutional Variables	164
8.2.5 Intervening Variables	165
8.2.6 Dependent Variables	166
<b>8.3 Mutual Relations Analysis</b>	167
8.3.1 Overview of Significant Variables	167
8.3.2 Model of Mutual Relations Analysis	168
<b>8.4 Multivariate Analysis: OVERALS</b>	174
8.4.1 OVERALS Nonlinear Canonical Correlation Analysis	174
8.4.2 Projection of Variables and Objects in the Canonical Space	176
<b>8.5 The Analytical Model: Multiple Regression Analysis</b>	177
8.5.1 Calculation of Correlation Coefficients	177
8.5.2 The Final Model of Utilisation of the Plural Health Information & Communication System (PHICS)	179
<b>8.6 Interpretation of the Results of the Analysis</b>	180
Notes	185

<b>Chapter IX CONCLUSIONS AND IMPLICATIONS</b>	187
<b>9. Conclusions</b>	187
<b>9.2 Implications</b>	196
9.2.1 Theoretical Implications	196
9.2.2 Practical Implications	198
<b>9.3 Towards a Model of Integrated Health Information &amp; Communication Systems (IHICS)</b>	201
<b>Bibliography</b>	205
<b>Appendix I: The Dewey Decimal Classification (DDC) System</b>	217
<b>Abbreviations</b>	218
<b>Summary</b>	221
<i>Samenvatting</i>	231
<i>Curriculum Vitae</i>	241
