This study has been made possible thanks to the gracious support of the Leiden Ethnosystems and Development (LEAD) Programme of Leiden University

Also, the Ministry of Higher Education, Research and Technology in Indonesia and Universitas Padjadjaran have kindly supported several years of my study and repeated visits to the research area of Subang in the Sunda Region of West Java, Indonesia.

Cover Sketch and Design: Iqbal Saefullah, Hanfa Saefullah, Tsalitsa Saefullah, and R. Akil.

The cover symbolises the triadic structure which characterises the Sundanese cosmology and its relation to the three circles of sustainable development. The picture inside the circles symbolises the characteristics of the livelihood in Subang: farmers, fishermen, the dance of Subang *Sisingaan*, with a *Gintingan* Vessel in the center.

This dissertation is dedicated to my father, Asep Djadja Saefullah and to my mother, Nurhayati Saefullah, for their extraordinary support throughout my life, and to my dearest wife, Vina Adriany and our three children: Iqbal, Hanfa and Tsalitsa.

Acknowledgements

The completion of this dissertation would not have been possible without the invaluable support and guidance of a large number of individuals contributing to the study of the role of Indigenous Institutions in Sustainable Community-Based Development, with a specific focus on the institution of *Gintingan* in the Sunda Region of Subang, West Java, Indonesia.

In particular, I would like to express my gratitude to the LEAD Programme and its Members for their enormous encouragement and support for the completion of this most challenging PhD study.

I take the opportunity to thank my family, friends and colleagues both in The Netherlands and Indonesia, especially the local people in the four villages of Subang for their continuing support without whom this study would not have been possible.
