**Author:** Morelli, L.

**Title:** Travelling Patterns on Discrete Media

**Issue Date:** 2019-06-25

# Acknowledgements

Nothing of this could have been possible without the incredible support of my supervisor, Dr. Hermen Jan Hupkes. He is an incredible person and quite possibly the most enthusiastic mathematician I ever met. Every time I have been in struggle I knew his door would always be open for me. It is only thanks to his guidance and encouragement that I managed to finish my Ph.D..

A sincere 'Thank you' goes to Dr. Petr Stehlík for the invaluable collaboration we had in the last years. It has been the most enjoyable part of my doctorate.

Heartfelt thanks go to the Doctorate Committee Dr. Maila Brucal-Hallare, Prof. Dr. Arnd Scheel and Prof. Dr. Erik S. Van Vleck for the time spent reading my thesis.

Liuba and Marta, having you two by my side during these past years and especially in this last step of my Ph.D. meant a lot to me. You are irreplaceable, and I mean it.

If I managed to survive outside of the Mathematical Institute, it is mostly because of my two recently acquired siblings, Dimitris and Marina. I did not share a house with you two, but a home. I know I can always count on you, and if I am the person I am today it is mostly thanks to the two of you. No ocean can ever separate us, I promise.

Claudiu, you have been since the first moment my best friend. Before moving to the Netherlands, I could have never hoped to meet someone like you. You have been an amazing officemate and an invaluable presence in my life.

Mima, I have never met anyone with whom I shared so much. The only thing that can improve concerts, bad movies and carbonara is a true friend by your side.

Now to my товариш по преступлению, Liza. These last two years with you in the Castle have been great. Спасибо.

I want to thank my family, for understanding and supporting my decision to move abroad to continue my studies.

Finally, I am thankful to have met, inside and outside the MI, so many special people I can call Friend.

# Curriculum Vitae

Leonardo Morelli was born in Rome, Italy, on the 17th October 1989. He completed his high school studies at *Liceo Scientifico Augusto Righi* in 2008. He subsequently enrolled in the BSc in Mathematics at *La Sapienza University* in Rome. After he graduated in 2011, he continued his studies with a MSc in Applied Mathematics in the same university. In 2014 he graduated under the supervision of Prof. Dr. Marco Isopi, by defending his thesis "*Rumor spreading and SIR model on random evolving graphs*". In September 2014 he moved to Leiden, the Netherlands, to start his Ph.D. in the dynamical systems group under the supervision of Dr. Hermen Jan Hupkes at *Leiden University*. In 2016 he helped organizing the *NDNS+ PhD Days* conference in Lunteren. Between 2014 and 2018 he served as teaching assistant in several English and Dutch spoken courses. He also presented his research at several conferences in the Netherlands and the United States of America.
