List of Publications

1. **Hongchang Shan**, Yu Liu, and Todor Stefanov,
   "A Simple Convolutional Neural Network for Accurate P300 Detection and Character Spelling in Brain Computer Interface",

2. **Hongchang Shan**, and Todor Stefanov,

3. **Hongchang Shan**, and Todor Stefanov,
   "A Novel Sensor Selection Method based on Convolutional Neural Network for P300 Speller in Brain Computer Interface",

4. **Hongchang Shan**, Yu Liu, and Todor Stefanov,
   "Ensemble of Convolutional Neural Networks for P300 Speller in Brain Computer Interface",
   In *Proceedings of the 28th International Conference on Artificial Neural Networks (ICANN’19)*, pp. 376-394, Munich, Germany, September 17-19, 2019.

5. **Hongchang Shan**, Yu Liu, and Todor Stefanov,
   "An Empirical Study on Sensor-aware Design of Convolutional Neural Networks for P300 Speller in Brain Computer Interface,"
   In *Proceedings of "12th IEEE International Conference on Human System Interaction (IEEE HSI’19)"*, pp. 5-11, Richmond, Virginia, USA, June 25-27, 2019
