ACKNOWLEDGEMENTS

During the last four years I kept old friends, but also met new ones all over the world. All of you contributed somehow to the realization of this thesis, and I would like to thank everyone.

At the Centro de Química Física Molecular of the Instituto Superior Técnico (Portugal) everybody was very friendly, enthusiastic and willing to help. I really enjoyed the time I worked there as an undergraduate and then as a graduate researcher. I would like to thank Prof. Mário Nuno Berberan, Prof. Gaspar Martinho and Prof. Prieto for all the support and motivation to pursue my studies in Astrobiology and meteorites. Dear Sandrine, I really appreciate all our conversations and the fact that you always had a nice word to say. I thank Maggie for the lovely time I had in Ireland.

I am very thankful to all the members of the Astrobiology group (James, Inge, Oliver, Nick, Richard and Zan), who were always willing to help (both at work and outside) and created a great working environment to do my PhD. Zan, dankjewel voor de vertaling van mijn samenvatting. Working in the Gorlaeus building was a great opportunity to interact with the people of the SCM and CIS groups. Silvia, thank you very much for your hospitality when I first got to Leiden, and for the tasty dinners during these four years (especially the tiramisu!). I also kept in contact with the people of the Sterrewacht. It was always great fun to watch the Forza football team play, no matter what the score was! During my PhD I also travelled abroad to perform some of my research. I thank Luann for the time I spent at Santa Barbara. I would like to thank all the people at the Open University who always made me feel welcome. Additionally, I would like to thank Mark for the hospitality when I went to the Open University and Imperial College. I also greatly appreciated the hospitality of everyone at NASA Goddard (including Danny, Paul, Jason and Mehdi) and at the Carnegie Institution of Washington (including Marilyn and Conel). Danny, Flo and Cedric thank you for a great time in Washington DC and for taking me out of “exciting” Old Greenbelt! I also thank Oliver and his family for the hospitality during my stay in DC. I am pleased to have participated in a Summer School in Portugal, organized by Maarten Ross-Serote. I also enjoyed the friendly atmosphere and the telescope observations at the Winter School in Arizona, organized by Michael Meyer and Cathi Duncan.

Rita and Tiago, I am always happy to see you and to go out with you when I am in Portugal. Margarida, I am pleased to have been able to share my thoughts with someone else also doing a PhD in the Netherlands. Maria, our yoga classes were always great fun,
Acknowledgements

even when we did not understand the jokes of the professor. My social life in Leiden would not have been the same without the Portuguese people from ESTEC/ESA: Jorge, Xico, Lia, Filipe, Pedro, Vilaça, Hugo... thank you for all the dinners, parties, conversations and support.

Matt, thank you for your endless patience, support, friendship, visits all over the world, and for a million other things that I appreciate so much!

Quero agradecer especialmente à minha família (Mãe, Pai, Paulo, Tuxa e Pedro) pelo amor incondicional, motivação e apoio que sempre me deram, o que me permitiu sonhar mais alto e realizar os meus sonhos.
